Set up Split-type AC

Please complete the following steps:

1. Power on the device.

2. Either

① Press the "LED" or "Do Not Disturb" button on the remote control 7 times until the device shows "AP" on the display or

② Press the "Set" button. Then, press the "OK" button when the wifi flashes.

I have completed the steps above

Next

Connect to the device's wireless network

Go to the Wi-Fi settings on your smartphone, then select the wireless network that starts with “net_ac_” and return to the SmartHome app.

net_ac_

may be 4 numbers or letters

12345678

Enter the password above if needed

It's ok if it says there is no internet connection. Please make sure to stay connected.
